

LU2: Strategic Frameworks for the Digital Age

Mastering modern analytical tools, platform dynamics, digital value chains, and transformation maturity roadmaps.

DELIVERY DURATION
3 Hours (180 Mins)

SCHEDULED BREAK
15 Minutes

STRUCTURE
4 Learning Outcomes + 4 Activities

Overall Unit Learning Outcomes

LO1 • 45 MINS

Adapt Strategic Tools

Adapt classic tools (SWOT, PESTLE, Porter's 5 Forces) to evaluate digital industry dynamics and platform economies.

LO2 • 45 MINS

Digital Value Chains & BMC

Design and reconfigure digital value chains and Business Model Canvases (BMC) for tech-driven ventures.

LO3 • 45 MINS

Blue Ocean & Innovation

Apply Blue Ocean Strategy and disruptive innovation principles to unlock uncontested market space in digital sectors.

LO4 • 45 MINS

Digital Maturity & Roadmap

Utilize digital maturity models and diagnostic tools to benchmark readiness and guide transformation roadmaps.

MODULE 1

LO1: Adapting Strategic Analytical Tools

Evaluating Platform Economies & Digital Industry Dynamics through
Modernized Strategic Frameworks

LO1: Modernizing Classic Strategic Analytical Tools

Shift to Digital Frameworks

Traditional frameworks were built for linear pipeline businesses. In digital ecosystems, parameters change rapidly:

- ✓ **Digital SWOT:** Focuses on data assets, API ecosystems, and rapid technological obsolescence over traditional physical assets.
- ✓ **Digital PESTLE:** Emphasizes algorithmic regulation, cybersecurity mandates, cloud adoption, and ESG tech compliance.
- ✓ **Digital Porter's 5 Forces:** Incorporates multi-sided market effects, zero-marginal cost threats, and user lock-in through platform network loops.

LO1 Activity: Platform Economy Matrix Workshop

HANDS-ON GROUP EXERCISE

🕒 25 Mins Activity + 10 Mins Pitch

Evaluating Platform Network Effects with Digital Porter's 5 Forces

📋 Task Instructions

- ✓ Select a major platform venture (e.g., Ride-sharing, Cloud Marketplace, or FinTech App).
- ✓ Map out the **Direct & Indirect Network Effects** strengthening platform retention.
- ✓ Re-evaluate Porter's 5 Forces: Analyze threat of substitutes in a low-friction API environment.

🏆 Deliverable & Output

Produce a 1-page Digital Porter's Matrix identifying the single greatest structural vulnerability of your assigned platform enterprise.

OUTCOME: MASTERY OF DIGITAL INDUSTRY DYNAMICS

MODULE 2

LO2: Digital Value Chains & Business Model Canvas

Reconfiguring Tech-Driven Value Architecture and Scalable Monetization
Canvases

LO2: Reconfiguring Digital Value Chains & BMC

Key Value Architecture Shifts

- ✓ **Linear to Ecosystem Value Chains:** Shifting from supplier-to-customer pipes to automated ecosystem loops with third-party integrators.
- ✓ **Key Resources:** Data assets, machine learning models, cloud infrastructure, and proprietary algorithms replace physical hardware.
- ✓ **Cost Structure Optimization:** Shifting high CapEx to operational cloud OpEx with near-zero marginal cost of scaling.
- ✓ **Revenue Streams:** Subscription (SaaS), freemium usage, marketplace transaction take-rates, and data monetization.

LO2 Activity: Reengineering Tech Business Model Canvas

INTERACTIVE SIMULATION

Transforming a Legacy Enterprise into a Tech-Driven BMC

 30 Mins Challenge + 10 Mins Debrief

Step 1: Scenario Brief

Take a traditional brick-and-mortar logistics or retail company struggling with traditional overhead.

Step 2: Canvas Re-design

Pivot 3 core building blocks: Channel (API/App), Value Proposition (AI personalization), and Revenue (Subscription).

Step 3: Pitch & Defend

Present your transformed digital value chain to peers, demonstrating lower operational drag.

 SCHEDULED REFRESHMENT BREAK

15 Minutes Duration (Following LO2 Completion)

MODULE 3

LO3: Blue Ocean Strategy & Innovation

Unlocking Uncontested Market Space in Digital Sectors via Disruptive
Innovation

LO3: Creating Uncontested Market Space

Principles of Digital Blue Ocean

Rather than competing in crowded "Red Oceans" of head-to-head pricing, tech ventures leverage four action frameworks:

- ✓ **Eliminate:** High sales commissions, physical branches, legacy hardware infrastructure.
- ✓ **Reduce:** Customer onboarding friction, manual transaction verification times.
- ✓ **Raise:** Algorithmic accuracy, user interface speed, ecosystem interoperability.
- ✓ **Create:** Entirely new value curves (e.g., on-demand access, predictive automation).

Boeing's Four Actions to Create Value Innovation with its 787 Dreamliner

Eliminate	Raise
Design errors and unworkable designs through use of virtual digital models and simulations	Passenger comfort: more spacious seats and aisles, bigger windows and overhead bins, and a smoother ride Cargo capacity and flying range compared to similarly sized airplanes
Reduce	Create
Fuel costs – Uses 20% less fuel than similarly sized airplanes Maintenance time and cost Training time for existing Boeing 777 pilots due to flight deck commonality Noise during takeoff,	Unprecedented flexibility for carriers to serve both short- and long-range routes efficiently New route development and profitable growth opportunities for carriers Design flexibility to enable

LO3 Activity: Digital Value Curve Innovation Sprint

BREAKOUT GROUP CHALLENGE

 25 Mins Activity + 10 Mins Review

Drafting a Disruptive Digital Four Actions Matrix (ERRC)

ELIMINATE

What traditional industry factors should be completely removed?

REDUCE

What factors should be reduced well below industry standards?

RAISE

What factors should be raised well above industry standards?

CREATE

What new value sources should be created that the industry never offered?

Deliverable: Plot your new digital value curve against the dominant incumbent on a visual chart.

MODULE 4

LO4: Digital Maturity Models & Transformation

Benchmarking Organizational Readiness & Navigating Transformation
Roadmaps

LO4: Digital Maturity Diagnostics & Roadmaps

4 Pillars of Digital Maturity

- ✓ **Digital Culture & Leadership:** Agility, innovation tolerance, data-driven decision making.
- ✓ **Technology Stack Architecture:** Cloud-native systems, API readiness, security compliance.
- ✓ **Data & Analytics Capabilities:** Real-time telemetry, predictive insights, unified data models.
- ✓ **Operations & Process Automation:** CI/CD workflows, automated customer touchpoints.

LO4 Activity: Diagnostic Benchmark & Action Roadmap

FINAL CAPSTONE DIAGNOSTIC

Assessing Organizational Readiness & Designing Phase 1 Roadmap

 30 Mins Activity + 10 Mins Wrap-Up

Readiness Assessment

Evaluate a case organization across the 5 Stages of Maturity (Ad-hoc → Emerging → Centered → Scale → Optimized).

90-Day Execution Roadmap

Formulate 3 immediate high-impact quick wins for leadership buy-in and digital architecture upgrade.

 End of Learning Unit 2: All 4 Learning Outcomes Mastered
