

🕒 TOTAL DURATION: 180 MINS (3 HOURS) | 📺 BREAK: 15 MINS

LU1: Fundamentals of Digital Business Strategy

Navigating Strategic Transformation, Digital Value Networks & Business Alignment

Session Schedule & Timeline

Time / Duration	Topic & Learning Focus	Activity / Delivery Mode
00:00 - 00:15 (15m)	Course Intro & Unit Learning Outcomes	Lecture & Interactive Q&A
00:15 - 00:50 (35m)	LO1: Digital Business vs. Traditional E-Commerce	Mini-Lecture (20m) + Activity 1 Case Study (15m)
00:50 - 01:25 (35m)	LO2: Linear Business Models vs. Value Networks	Concept Mapping (20m) + Activity 2 Workshop (15m)
01:25 - 01:40 (15m)	 Scheduled Session Break	Networking & Refreshment Break
01:40 - 02:15 (35m)	LO3: Enterprise Transformation Drivers	Lecture (20m) + Activity 3 Matrix Analysis (15m)
02:15 - 02:50 (35m)	LO4: Alignment, Culture Change & Digital ROI	Strategy Presentation (15m) + Activity 4 ROI Exercise (20m)
02:50 - 03:00 (10m)	Summary, Wrap-Up & Key Takeaways	Class Discussion & Next Steps

Unit Learning Outcomes

LO1: Core Concepts & Evolution

Explain the key definitions, evolution, and foundational principles of digital business vs. traditional e-commerce.

LO2: Linear vs Value Networks

Analyze the core operational and strategic differences between traditional linear business models and digital value networks.

LO3: Enterprise Drivers

Identify key market, technological, and customer drivers behind enterprise digital transformation.

LO4: Alignment, Change & ROI

Evaluate methods to align digital initiatives with overarching business goals while managing organizational change and performance ROI.

LO1: Digital Business Concepts

Definitions, Evolution, and Foundational Strategic Principles

Digital Business vs E-Commerce

Traditional E-Commerce

Primary Focus: Transactional activities focused on buying and selling goods/services online.

Scope: Outward-facing revenue channel, customer portals, and payment gateway integration.

Value Creation: Digital storefront facilitating electronic trade and automated sales.

Holistic Digital Business

Primary Focus: End-to-end organizational transformation leveraging modern tech stack.

Scope: Integrates internal operations, supply chains, partner ecosystems, and customer touchpoints.

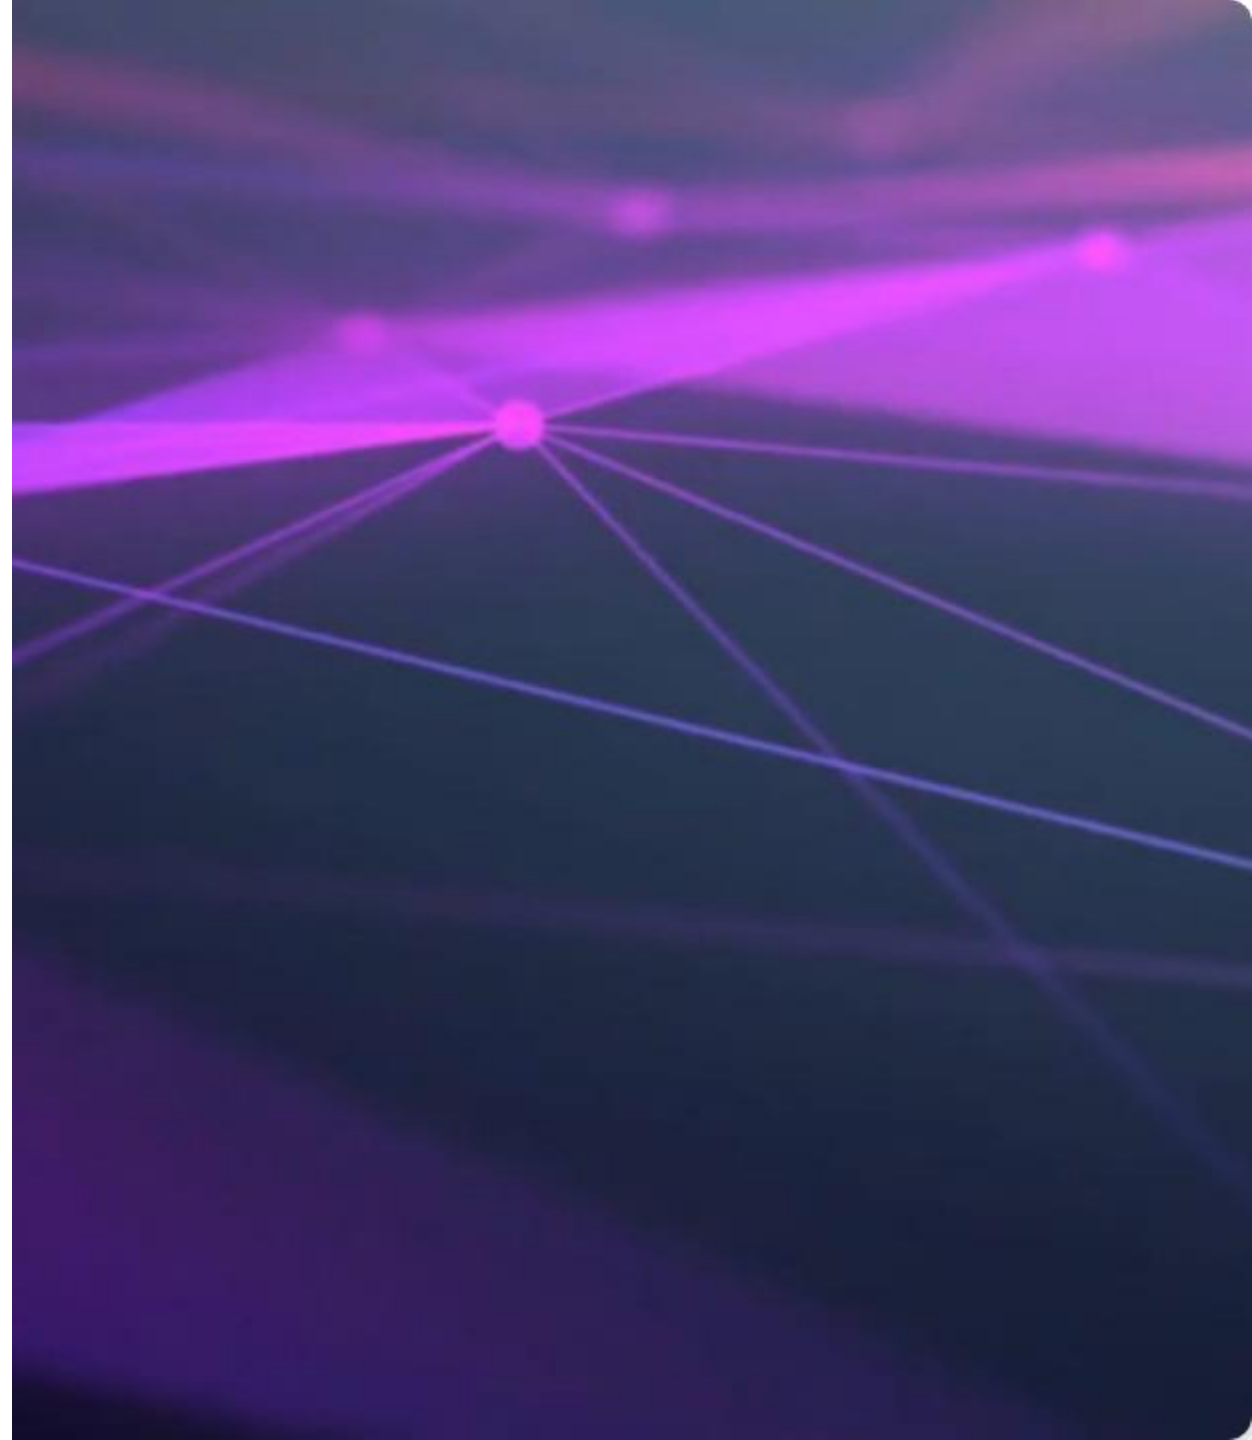

Value Creation: Platform-driven capabilities, data monetization, and agile business models.

Evolution of Digital Strategy

From Websites to Ecosystems

The progression of enterprise technology spans three distinct strategic eras:

- 1. Web Presence (1990s):** Basic information sharing and brochureware.
- 2. E-Commerce Era (2000s):** Online transactions, CRM integration, and digital marketing.
- 3. Digital Business (Present):** Platform models, AI automation, cloud systems, and dynamic value ecosystems.

LO1 Activity: Case Study

SMALL GROUP ACTIVITY (15 MINS)

Objective: Evaluate a traditional retail enterprise transitioning to a digital business ecosystem.

1. Identify (4 Mins)

Analyze Company X's current model. List 3 functions that are purely *e-commerce* vs. 3 that reflect a *digital business* approach.

2. Brainstorm (6 Mins)

Propose 2 new digital business capabilities (e.g., IoT data monetization, automated partner API integration).

3. Share (5 Mins)

Each group presents 1 key differentiator between their proposed digital business strategy and simple online selling.

LO2: Digital Value Networks

Analyzing Operational and Strategic Shift from Linear Supply Chains to Ecosystems

Linear Models vs Value Networks

Strategic Dimension	Traditional Linear Model	Digital Value Network
Structure	Sequential value chain (Supplier → Producer → Distributor → Buyer)	Multi-directional matrix & platform ecosystems
Customer Role	Passive consumer at the end of the supply chain	Active co-creator, data source, and ecosystem participant
Data Flow	Siloed, batch-processed, delayed feedback loops	Real-time, continuous cloud data exchange across network
Scalability	Linear scale tied heavily to physical assets & capital	Exponential scale driven by network effects and software

LO2 Activity: Network Mapping

INTERACTIVE WORKSHOP (15 MINS)

Objective: Re-engineer a linear business supply chain into a multi-directional digital value network.

1. Map Linear Chain (4 Mins)

Sketch the standard linear flow for a traditional industry (e.g., Automotive, Healthcare, or Logistics).

2. Design Network (6 Mins)

Add data nodes, platform partners, third-party developers, and feedback loops into a network mesh.

3. Evaluate Value (5 Mins)

Identify where new network effects create exponential value compared to the old linear model.

LO3: Transformation Drivers

Market, Technological, and Customer Forces Shaping Digital Business

Core Drivers of Change

Market Drivers

New digital entrants, industry disruption, shifting economic pressures, and the imperative for speed-to-market agility.

Tech Drivers

Rapid advancement of Cloud Computing, Artificial Intelligence, Big Data Analytics, and IoT infrastructure.

Customer Drivers

Demand for hyper-personalized experiences, omnichannel access, instant fulfillment, and transparent interactions.

LO3 Activity: Driver Analysis

GROUP BRAINSTORMING (15 MINS)

Objective: Rank and categorize external transformation drivers for a selected industry scenario.

1. Categorize (4 Mins)

List the top 2 Market, Tech, and Customer drivers affecting your assigned industry sector.

2. Prioritize (6 Mins)

Plot drivers on an Impact vs. Urgency matrix to determine immediate strategic focus areas.

3. Present (5 Mins)

Defend your #1 driver selection and explain why failing to adapt creates competitive risk.

LO4: Alignment, Change & ROI

Executing Digital Strategy, Managing Culture, and Quantifying Financial Value

Strategic Alignment & ROI

Organizational & Goal Alignment

Strategic Mapping: Connect digital KPIs directly to enterprise revenue, cost reduction, and market share goals.

Change Management: Address cultural resistance through continuous upskilling, clear communication, and leadership advocacy.

Evaluating Performance & ROI

Multi-Metric Framework: Measure short-term operational efficiency alongside long-term strategic value and enterprise agility.

$$\text{Digital ROI} = \frac{\text{Net Financial Gains}}{\text{Total Digital Investment}} \times 100 \%$$

LO4 Activity: ROI Strategy

APPLIED WORKSHOP (20 MINS)

Digital Business Case & Change Plan

Task 1 (8 Mins): Calculate expected Digital ROI for a \$500k cloud transformation producing \$1.2M in cumulative efficiency gains.

Task 2 (7 Mins): Outline a 3-step cultural change program to overcome staff resistance to new automated AI workflows.

Task 3 (5 Mins): Present proposed alignment metrics to the executive board.

Questions & Discussion

End of LU1: Fundamentals of Digital Business Strategy (180 Mins Completed)

[Next: LU2 – Strategic Framework for Digital Age](#)
