

Teacher's Revision

Topics to Study

Digital Business Strategies and Operations

Type of Exams (Written + Lab) – 2 Hours and 10 minutes

- Part I – MCQ (20 Questions) – 20 Marks (Written)
- Part II – Short-Answer Questions (5 Questions) – 30 Marks

Each Question is worth 6 Marks (Written)

- Part III – Practical/Laboratory – (Manus AI and/or Base44) prompt it with a workflow and build the system prototype (50 Marks)

Task 1 – Writing

Task 2 – Writing

Task 3 – Manus AI/Base 44

Task 4 - Writing

LU1

- Difference between E-commerce and Digital Business (Focus, Value Creation, Scope). Provide real-world examples in terms of difference
- Understand the concept of Digital Value Network (Digital Transformation)

LU2

- The concepts of Digital Strategic Tools (E.g., PESTLE, SWOT, Porter's Five Forces Model)
- Explain the concept of Digital Value Chain (BMC) – Tech-Driven
- Understand how Blue Ocean is used to come up with Digital Transformations for a business (Eliminate, Raise, Reduce, Create)
– Looking at Traditional/Legacy towards Digitalized Workflows/Systems

LU3

- Give examples of a multi-sided platform Architecture (Healthcare, SCM, Manufacturing, Buying-Selling, Education, Hotel)
- Understand the components of Digital Transformation Strategies (Cloud Computing, ERP, AI Workflows, IoT)
- Differentiation between a Digital Native and Legacy System (Traditional)

LU4

- Understand the Agile and lean operations (Healthcare, SCM/Logistics, Education, Hotel, Typical buying-selling) – Identification of Digital Waste, Kaizen (Continuous improvement)
- What is RPA? How RPA works? – Logistics/SCM
- What makes the customer experience better? How to improve customer experience in the context of Technology? – Synergy (Omnichannel vs. Multichannel)
- OTIF (On-Time In Full) – Core Operational KPIs should be reflected in the Digital E-Business Model through Dashboards

LU5

- How cloud computing, IoT, AI and Blockchain is used/integrated in the process/workflow to streamline and correct gaps?
- Why integrate these technologies? – the purpose is for cost/time effectiveness
- The software/system/digital solutions should integrate different operations of the organization and be able to provide data that can be used in decision making.
- Elements/Components of Roger's Innovation Framework (Innovators, Early Adopters, Early Majority, Late Majority, Laggards)
- Understand the concepts of security in software/system/digital solutions and zero trust

Sample MCQ Questions

Which statement best distinguishes digital business from traditional e-commerce?

- A. Digital business only focuses on online payment processing.
- B. Digital business focuses exclusively on digital marketing.
- C. Digital business integrates technology across operations, supply chains, partners and customer touchpoints.
- D. Digital business is simply a website with an online shopping cart.

Sample MCQ Questions

Which sequence best represents the evolution of digital strategy?

A. AI → Web Presence → E-Commerce

B. Web Presence → E-Commerce → Digital Business

C. E-Commerce → Web Presence → Digital Business

D. Web Presence → Digital Business → E-Commerce

Sample MCQ Questions

In a digital value network, customers are more likely to be viewed as:

- A. Passive recipients
- B. End points in a supply chain
- C. Co-creators and ecosystem participants
- D. Suppliers of physical inventory only

Sample MCQ Questions

Which of the following is primarily a customer driver for digital transformation?

- A. Cloud computing
- B. Artificial intelligence
- C. Demand for personalised and omnichannel experiences
- D. Legacy hardware replacement

Sample MCQ Questions

A Digital SWOT analysis places greater emphasis on which of the following?

- A. Physical buildings and machinery only
- B. Data assets and API ecosystems
- C. Employee uniforms
- D. Traditional distribution channels only

Sample MCQ Questions

Customer journey mapping is primarily used to identify:

- A. Employee salaries
- B. Customer steps, pain points and digital touchpoints
- C. Competitor financial statements
- D. Network security protocols only

Sample MCQ Questions

Which KPI is particularly relevant to order fulfilment performance?

- A. OTIF (On-Time In-Full)
- B. Number of employees
- C. Office size
- D. Number of company websites

Sample MCQ Questions

Which technology captures real-time telemetry from physical assets?

- A. Blockchain
- B. IoT
- C. SaaS
- D. CRM

Sample MCQ Questions

Which combination best represents the logistics architecture?

- A. IoT → Cloud → AI
- B. Blockchain → Website → Email
- C. CRM → Spreadsheet → Printer
- D. Website → Social Media → Payment Gateway

Sample MCQ Questions

According to Rogers' Diffusion of Innovation framework, which group generally requires proven ROI and case studies?

- A. Innovators
- B. Early Adopters
- C. Early Majority
- D. Laggards

Sample MCQ Questions

Which principle is central to Zero Trust?

- A. Trust all internal users
- B. Trust users once they enter the network
- C. Never Trust, Always Verify
- D. Give all users administrator access

Generate a Manus AI/Base44 Application to streamline the workflow below

The current workflow is:

What are the digital waste to eliminate?

1. Manual Data Entry (Overprocessing)
2. Defects (Error in data entry, system bugs, operational glitches)
3. Waiting Time
