 HEALTHCARE DIGITAL TRANSFORMATION

Digital Drivers in Singapore Healthcare

Exploring Market, Technology, and Customer Drivers Shaping Modern Health Delivery

PILLAR 01

Market Drivers

"Why must healthcare organisations change?"

External market forces and demographic pressures compelling Singapore's healthcare sector to innovate.

Market Drivers in Singapore

Demographics & Demand

Ageing Population: Rapidly expanding elderly demographic requiring long-term chronic disease management.

Rising Demand: Escalating volume of chronic conditions driving telehealth and preventive care strategies.

Efficiency & Workforce

Cost Pressures: Urgency to boost productivity while curbing treatment costs via digital automation.

Workforce Relief: Alleviating doctor and nurse workload pressures with AI-assisted clinical workflows.

Healthier SG Strategy

Shifting to Preventive Care

Singapore's Healthier SG program transforms healthcare from reactive hospital care to proactive community wellness.

Digital platforms empower family doctors to create personalized care plans, monitor patient metrics, and deliver continuous preventive care.

PILLAR 02

Technology Drivers

"What makes transformation possible?"

Enabling digital tools and platform architectures facilitating modern medical services.

Core HealthTech Enablers

AI & Analytics

Assists clinical decisions, analyzes medical imaging, and predicts fall risks or high-risk patient interventions.

Telemedicine

Enables virtual consults, video check-ins, and online care without requiring physical clinic visits.

IoT & Wearables

Monitors vital signs, glucose levels, and heart metrics continuously in real-time from patient homes.

National EHR Ecosystem

Connecting Care Providers

- **Unified Access:** Authorized healthcare professionals access patient records across hospitals, polyclinics, and GPs.
- **Ecosystem Model:** Replaces isolated hospital data silos with a connected, patient-centric ecosystem.
- **Cloud & Security:** Hosted on scalable, encrypted cloud infrastructure with secure digital identity authentication.

DIGITAL HEALTH MARKET: SIZE & SHARE

MARKET SNAPSHOT

Market Size in 2024 (Value)	USD 162.10 BN
Market Forecast in 2030 (Value)	USD 573.53 BN
CAGR	23.6%
Years Considered	2023–2030
Base Year	2024
Forecast Period	2025–2030
Units Considered	Value (USD BN)
Fastest-growing Region	Asia Pacific

PILLAR 03

Customer Drivers

"What do patients expect?"

Changing patient behaviors and expectations driving consumer-friendly digital healthcare solutions.

Patient Demands vs Solutions

Customer Driver	Patient Expectation	Digital Healthcare Response
Convenience	"I don't want to travel for every routine check."	Telemedicine & Remote Consultations
Speed & 24/7 Access	"I need quick appointments & instant info."	Online Booking & Mobile Health Portals
Personalisation	"I want care tailored to my personal needs."	AI Analytics & Personalised Health Plans
Continuous Monitoring	"I want my health tracked between visits."	Wearables & Remote Patient Monitoring

Transformed Patient Journey

Transformation Impact Drivers

Key Insight: Digital transformation in Singapore transcends online booking; it re-engineers the entire care ecosystem across Market, Technology, and Customer pillars.

Summary & Framework

Aligning Market, Technology, and Customer Drivers

Market (Why?)

Ageing populace, chronic disease, healthcare cost pressures, and Healthier SG initiatives.

Tech (How?)

AI analytics, NEHR ecosystem, IoT wearables, telemedicine, and cloud platforms.

Customer (What?)

Convenience, 24/7 mobile access, speed, continuous monitoring, and personalized care.
